RV Institute of Management®

Autonomous Institution Affiliated to Bengaluru City University | Approved by AICTE NAAC 'A+' Accredited

Ref: H13/RVIM/MBA/2022-23

Forwarded to Honorary Secy Sis, RSST

From

Dr Tamizharasi
Professor, Department of Finance
RVIM
Bangalore

As discussed some time back Sis, we would like to set up "Centre for Financial Markets & Research" (one of the two new computer labs)

To strengthen this Centre we would like to partner with NSE and buy 30 NSMART licenses (Simulated market Trading App's software) installed in 30 computers. Students can actually invest in equity & derivatives listed on NSE using virtual currency in courses and experiment with different investment strategies & create their own portfolios.

We visited IIM-B and experienced the NSMART platform. One time installment cost is ₹.2.5 Lakh & recurring subscription cost is ₹.0.75 Lakh (30 x ₹2500) For your kind consideration & approval.

To

The Director
RVIM
Bangalore

Subject: Requisition for approval to set up finance lab at RV Institute of Management

[Signature]
24.01.2023

With respect to the above subject, I would like to bring to your kind information that the top management institute in India and abroad do set up a finance lab for the benefit of students to bridge the gap between theory and practice. The following are the advantages of setting up a finance lab for your kind perusal:

- To provide practical exposure to students in adopting the latest technology in the instruction of finance elective subjects
- NSMART-Simulated Market Trading application reproduces features of a live equity/derivative market on trading terminals for students to practice and learn trading securities without financial risk.
- The finance lab provides real-time or delayed market data, simulation software, and NSMART software loaded on our computer to illustrate various financial concepts and to train students in the use of technology to learn how market function.
- This facility is used for training students to become versatile traders, and portfolio managers, and also illustrate aspects of risk management in capital markets.

The simulated trading software along with market data is used to create a real-life trading experience (i.e., bringing D-Street into the finance class) in the lab.

Go. change the world

- It is a powerful resource that helps participants to understand trading operations, construct portfolios, hedge, and risk neutralize them, and manage them using different strategies across time
- This finance lab will be helpful to finance students to learn the subject called Investment Analysis and Portfolio Management (III Semester), and Financial derivatives (IV Semester).
- The mini-project can be assigned to students to make learning more interesting and in a simulated environment.
- Lab will also be used to assign real-time project in the above mentioned subjects as mentioned below:
 - Students will be divided into smaller groups
 - A fixed amount of virtual money may be allotted to each group
 - Students in the group start trading by constructing a portfolio
 - At the end of the semester, student groups will be evaluated based on the percentage of return earned by them.

With this backdrop, I request your approval and support to set up a finance lab using NSMART in our institute. Herewith I have attached the quotation for NSAMRT by National Stock exchange (NSE).

Thanking you,

D.

Yours faithfully,

Jayno
