

## **Ecosystem for Innovations**

Innovations through novelty and need for the social innovation, was analyzed referring to existing models adopted in various Innovation Labs across the world. The university syllabus set by the Bangalore University was not just enough to teach the students creative thinking skills through hands on work approach. A separate lab for innovations was the need then. In order to sustain the pedagogical model and to cater to the needs of bottom of the pyramid a new approach inclined towards social innovation was imperative in the classroom teaching. The concept of The Fortune at the Bottom of the Pyramid originally appeared as an article by C. K. Prahalad and Stuart L. Hart and the concept of 'Reverse Innovation' proclaimed by Vijay Govindarajan was thought of to be the right approach. To advance our approach it was decided to set up an Innovation Lab in the Campus. An E mail communication to confirm the linkage between CSR and Reverse Innovation with Vijay Govindarajan brought in to design a curriculum for the newly thought 'Social Innovation Lab'. Vijay Govindarajan, known as VG, is widely regarded as one of the world's leading experts on strategy and innovation. VG, NYT and WSJ Best Selling author is the Coxe Distinguished Professor at Dartmouth College's Tuck School of Business. At that point of time in 2012, the course had to be offered as a Value Additional Programme to supplement existing Bangalore University syllabus as the up gradation of syllabus was not completed. In 2015 Bangalore University introduced a new syllabus with the subject 'Innovation Management' a theory paper with term end examination and with reduced teaching allotted time of 2 hours per week. Meanwhile communications with all the leading institutions and industry professionals continued to evolve feasible teaching methods with evaluative rubrics for measuring the outcome of the classroom instructions and laboratory exercises. To provide hands on training RVIM had established communication with 'Visvesvaraya Industrial and Technological Museum'. This training aims to make conditions as realistic as possible. Visvesvaraya Industrial and Technological Museum houses a wealth of knowledge with working models in all fields. The museum was in proximity to RVIM Campus around 7 Kms. RVIM was forerunner to initiate the concept of Social INNOVATION in B-School with an additional 2

hours of practical sessions incorporated as an extra teaching and practical session every week. This was made possible with the support of Head of The Institution and Time Table Committee.

**E mail Image- Communications to Vijay Govindarajan, Coxie Distinguished Professor at Dartmouth College's Tuck School of Business**

Following this a series of communication was established with innovations lab to develop a measuring system through rubrics. This resulted in ultimately setting up of a Social Innovation Lab in RVIM Campus with existing Computer Lab access and a mandatory visit to Visvesvaraya Industrial and Technological Museum for real life experience. Added to this students were advised to commence their sessions on Massive Open Online Courses (MOOCs). This MOOCs courses relating to Innovation and Design Thinking was a part of the students learning beyond the campus learning and during leisure and vacations. Students were encouraged to register for the MOOCs programme offered through Edx.

The additional 2 hours of Innovation Lab Session, Visit to Technological Museum and incorporation of Edx MOOCs learning platform provided a synergetic approach to inculcate necessary skills to move ahead and protect the Intellectual Property Rights (IPR) FOR NEW INVENTIONS. Advancing the students thoughts to apply for Patents and Copyrights was laid. All necessary support for students to consult a Patent Attorney was encouraged. In case of social innovation ideas , contacts with Government agencies and NGOs were established to disseminate the ideas. Few students participated in Hackathon and other design contests offered through government portal <https://www.mygov.in/>

The RVIM Innovation Lab started in 2015 gradually gained acceptance among local community and academic circles.

Coordinator for Innovation Lab was awarded with 'AIMS WE School Innovation Award' in the year 2016 and 2018.

## TED-Ed Club Application

TED-Ed <tededclubs@ted.com>

Tue 9/9/2014, 3:04 AM

To: lecturer\_chandran@hotmail.com <lecturer\_chandran@hotmail.com>

Dear Chandran A,

Thank you for applying to start a TED-Ed Club! At this point, we are only able to approve TED-Ed Club Facilitators who are working in schools and educational organizations with students ranging between ages 8 through 18 (late primary school through high school), so are unable to approve your application.

While the program is currently geared toward younger students (as are the materials), we are looking into accommodating college students as the program grows. If you're open to it, we would like to keep your information on radar and potentially contact you for feedback and guidance on this.

In the meantime, we hope you'll share some of your experiences with us by posting on our community board (<https://community.ed.ted.com/teded>) or exploring the other great ways for college and university students to get involved with the TED community by visiting TED.com.

If you have any questions, please email [TEDEdClubs@ted.com](mailto:TEDEdClubs@ted.com)

Best wishes,

The TED-Ed Team

To: Chandran A <lecturer\_chandran@hotmail.com>; vtpckarnataka@gmail.com <vtpckarnataka@gmail.com>  
Cc: tv\_raju@rediffmail.com <tv\_raju@rediffmail.com>

Dear Prof Chandran

Greetings from Visvesvaraya Trade Promotion Centre!

Thanks for your call. VTPC is keen to work together with academia and industry in Karnataka for nurturing the innovation fabric of our State. I have visited the Civil Engineering Department of your Institute last year and conducted a half day workshop. We were also part of the Session on IPR last year, under your EDP banner (Dr.Narahari)

Pleasure to introduce our Organisation:

Visvesvaraya Trade Promotion Centre (VTPC) is the nodal agency for the promotion of international trade from the State of Karnataka, under the aegis of the Department of Industries & Commerce. Since its inception in 1965, we have been at the forefront in providing impetus to export initiatives.

Among our various initiatives, Capacity building across academia, industry, government and relevant stakeholders is on top of the radar. The VTPC conducts a variety of Awareness programs, training workshops and seminars across the length and breadth of the State for its stakeholders. These are in the nature of Export Awareness Programs (EAP), the Export Management Training Program (EMTP), a six day incisive training in the exports arena, Seminars and interactive sessions on the entire gamut of issues and challenges in the International Trade space.

Through the initiative by the Government - WTO & IPR Relay Cell, we have been closely working with Academia and industry in nurturing the innovation space through the conduct of sensitisation seminars/workshops and Training-the-Trainer programs in the international trade and WTO landscape, Innovation Management and the entire spectrum of Intellectual Property Rights. A One Day Training the Trainer workshop in Intellectual Property Rights for Faculty Members across disciplines has evoked very positive response with several requests coming in from academia for these initiatives.

As discussed with you, it would be a pleasure to visit your Institute and conduct the said workshops for the benefit of your Students and Faculty. Following are few Key Options for Training workshops which could be customised depending on the need of the audience:

Option 1: Half Day Sensitisation Seminar on WTO & International Trade Landscape (2 Sessions)

Option 2: Half day Innovation Management and IPR Workshop: Significance for Academia and its use in business and research (2 Sessions)

Option 3: A ONE Day Training the Trainer Intellectual Property Rights Workshop tailored exclusively for Faculty Members with 4 modules. The Modules would cover the following:

(a) Introduction to the entire Spectrum of Intellectual Property Rights

(Patents, Copy Rights, Trademarks, Industrial Designs, IC Layouts, Plant Varieties Protection, Geographical Indications, Trade Secrets and the like)

(b) Patentable and Non Patentable Subject Matter and Patent Filing Mechanisms and Procedure

(c) Online Prior Art Search: The nuances

(d) Take to Market/Commercialisation Options/Patent Portfolio Management

Option IV: One Day Seminar on International Trade

Option V: Seminar on Innovation Management and IPR

Kindly let us know the tentative dates/schedule in Dec 2014 and Jan 2015, when we could conduct the same at your Institute.

Look forward to working together.

Thanks & Regards

**Prabhavathi Rao**

Bangalore

Madam

Thank you for suggesting few innovative programmes for students this morning( December

11, 2014) over the phone. I shall consult the RVIM Time Table Committee for AVAILABILITY OF I Semester MBA students for half day workshop or orientation -on 'Innovation Management and Intellectual Property Rights' on December 20, 2014. I shall seek approval from my Respected Director and then confirm the date and time .

Secondly RVIM Students Volunteer in RVIM-CSR can support and assist desktop research to Visvesvaraya Trade Promotion Center(VTPC) . Recently we had launched a lot of field research activities under the Swachh Bharat -Swasth Bharat. I shall send you the report by next week to further rural and urban programme initiatives and interactions .

Finally in this mail the invitation is delivered inviting your support for the forthcoming Panel Discussion on 'Innovation in Public Services' to be held on Saturday December 13, 2014 from 4 pm -6 pm in Campus. Kindly share this invitation with other representatives and policy makes in the Government for greater dissemination of knowledge and action.

Thanking you

A.Chandran

Dear Sri Chandran,

Thank you for your contact with NineSigma and the background on RVIM.

I wish you every success in your programs, especially in the areas of social innovation.

NineSigma delivers open innovation services for clients to help them find global partners to solve challenges.

At this time I do not think we have mutual areas where we can actively collaborate but please keep me informed on the developing programs at the institute.

If you have specific areas where you think NineSigma could assist RVIM then please let me know.

Regards

Darren

Hi

Thank you for joining Project Sunlight, a growing community of people who believe it's possible to build a world where everyone lives well and lives sustainably. We will keep you updated on our progress, and will also be asking for your support over the coming months.

Please come back to the [site](#) and read about all the projects we are already involved in, and use your [profile](#) to let us know what topics matter to you the most.

Thanks again

**The Project Sunlight Team**

## Pedagogy

### Colour Coded Paper Used

Most of the lab exercises were conducted using colour coded paper. The paper shade selected to signify a unique identity. Hence students were encouraged to use One A4 sheet as a data and reporting sheet.

RVIM INNOVATION LAB WORKSHOP

- I have visited the web sites called 3m, Biocon and Issro. These three websites are providing lots of information and technologies, which I found out common from these three sites that technology. The three websites providing plenty of technologies like, 3m like pharmaceutical, space management, satellites etc..
- which is unique in these three websites, I have observed that 3m has lots of information about some products, like digital products, e-commerce products, automobiles etc. They have their own brand called something stockmax, and also they are providing some services like health care, hospitality and research and development. When I came into the Biocon website we can see that it is total about pharmaceutical, technology, its equipment, service and all. Like wise if you open the site named Issro, it is totally different from other two sites and all about space research organization. They are providing lots of information and like what are the mission, spacecraft launchers and its application, as well as they giving information about each and every usage of satellites, rocket, Astronaut etc. ~~from~~ These three sites are very useful for each and everyone, I have found that it is useful and effective.

## TASK 2

2015

### R.V. Institute of Management RVIM Social Innovation Lab

University Register Number: 141GCM0003

Name: Abhishek AV

#### Problem Identified:

Safe in Rest station in expressway

#### Topic of the Fact Sheet:

"Rest station in expressway"

Sources of Information : Internet, My own experience

Sources of Photographs : Internet,

#### Text to be reproduced in fact sheet and Citations :

1. Driving b/w 1AM to 4:30AM is Very important, during that time accident are more
2. Driving alone gets sleepy
3. Safe location off the road way to take a break & it is connect to expressway only
4. Passenger & driver may also get health problem for sitting on bus/coa for long time

**Video Case Study**

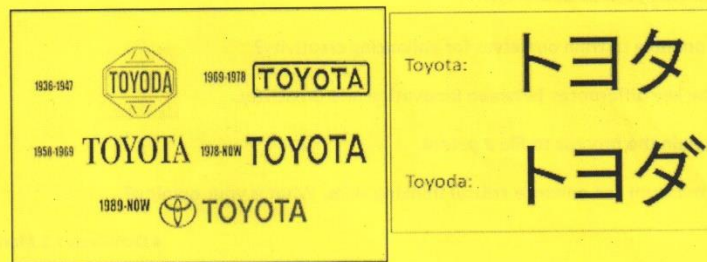

**Toyoda-When a stroke of brush changed it to Toyota**

**This case study needs to be answered after viewing the video "Toyota the Global Story" (20.57 min)**

Group viewing of the video at the Seminar Hall / Conference Hall and is scheduled prior to the commencement of examination from 9.00 am-9.21 am. Reporting time to the seminar hall is sharp 8.55 am

Supplementing the video the examinees are to read the case study text provided in the print version of the question paper and to answer all the questions in the case study section.

**Additional information**

Toyota Motor Corporation has its origins in a company that manufactured automated looms for Japan's weaving industry. In 1936, the company held a competition for a new name. Toyota was a popular choice from around 27,000 entries. The name was chosen "because the number of strokes to write Toyota in Japanese was eight, and it was thought to bring luck and prosperity". Writing 'Toyoda' in Japanese requires 10 strokes and writing 'Toyota' requires 8 strokes. The winning design led to the change in the name of the automobiles and plants from 'Toyoda' to 'Toyota'.

Founded in 1937, Toyota Motor Corporation engages in the design, manufacture, assembly, and sale of passenger cars, mini vans, commercial vehicles and related parts and accessories primarily in Japan, North America, Europe, and Asia.

2.20 p.m.	Respected Director shall be requested to address
2.30 p.m.	Task 1 for students commences and shall close at 4.00 p.m.

Only a note book and pen to be used for the session. Mobile Phones, bags to be kept in students locker

## **Outcome of RVIM Innovation Lab**

### **RVIM Innovation Lab designed Film Publicity Campaign**

The film industry is flooded with release of new films every week and the advancement in technology has restrained public to watch films in theatres. Film Director of a new film approached RVIM Innovation Lab to design an effective publicity campaign as the film was based on a strong message on social issue. The film was titled 'Varthamana'. Students worked together and came out with an effective suggestion plan.

The students spread across 4 sections worked in teams to evolve a novel and new method to reach the audience. The suggestions were mailed to the concerned film crew of Ultimate movies.

To  
The Respected Director  
RVIM

Sir,

I am pleased to inform that the draft review for the Marketing Strategies for the Kannada film 'Varthamana' is in progress and the report shall be ready for submission to -Ultimate Movies by Monday 30, 2016.

All the students of II Semester have brought in creative and out of box thinking approach to suggest their strategies. Around 145 students works has been processed. We worked with the theme Innovations in Marketing.

Mr. Bharat II Sem A, Mr. Venkatesh Gowda II Sem C, Mr. Hemanth II Sem B, Ms. Sahitya II Sem C, Ms. Priyanka Hatti II Sem C have visited the premier/teaser ad launch on 21 May 2016 at 11 am at Renukamba Theatre, 18<sup>th</sup> Cross, Malleshwaram.

The cover draft is attached for appraisal and approval

Thanking you

Yours faithfully

  
A.Chandran

The film is focused on a young man in today's world who sidelines the 'values' and realizes the mistake at the end. The film has a lot of lessons for young audiences.

Sir/Madam

Greetings from R.V.Institute of Management

Thank you for providing us an opportunity for exploring the marketing strategies for the release of the film 'Varthamana' (Your Letter dated 02.05.2016 An Opportunity to Explore, Ultimate Movies). As per your requirements the students worked independently and discussed in teams to bring out the best of their efforts.

Kindly find the Report summary in the PDF format in this mail attachment.  
Also the work sheet of individual student is in the Folder

We hope this effort could be of some help for your team in designing the marketing plans

All of us at RVIM wish you the best, for success of film screening in India and Abroad.

## **Tracking Potential Patents to Recycle Abandoned Tyres**

Huge size tyres are abandoned in forest areas after use. This was a major concern for a leading tyre manufacturer Bridgestone. Through Nine Sigma an open innovation platform the problem was informed. RVIM Innovation worked out constructive solutions to the existing problems and submitted the novel solution to overcome the issue of managing abandoned tyres.

The suggested methods and available patents were discussed in the class for understanding the process of patent tracking .In the due course of of class discussion many new ideas were generated and their feasibility were tested through discussion group.

The relevant documents and few photographs of the report were displayed on the notice board to share the ideas and to explain the process of open innovation method in tackling major issues in the society.

Sir

I am pleased to inform that a new project proposal relating to recycling of Tyres is accepted at stage 1, by Innovation Firm , Nine Sigma in Australia on behalf of their client Bridgestone Tyres worldwide.

The proposal is titled "Desktop research in tracing potential patents and innovative methods to recycle abandoned Off-The-Road (OTR) tires in mitigating climate change and environmental protection". It shall take 6 weeks for knowing the status. Till then I have to wait and make other related work.

All communications has been sent to your rediffmail for the past 1 week during preparation of proposal and communications from Nine Sigma.

This communication is for appraisal

Thanking you

Yours faithfully

## **Hackathon**

Student group led by Mr.RamaMohan participated in the Smart India Hackathon 2017.RVIM student team worked on the title 'National Master Database of Education and Career Attainment'. The greatest challenge in documentation process in education system is continuity of progress documentation at different levels from primary schooling to the centres of higher education. There are also possibility for some to discontinue in the process of aging due to varied reasons.

This problem was analysed by the team of students and developed a novel method for the hackathon competition.

The process of patent grant was demonstrated through live example by Coordinator. The patent drafting was briefly explained to the students and was motivated to take it forward in spite of many challenges .Some of the students realized the importance of novelty and innovative idea and worked many methods to develop improved skills in designing and drafting techniques. There is a unique advantage in students team work as many students come from varied background of study in their undergraduate level. Students having engineering, arts, commerce, bio technology and many more are ideal to form a synergetic team to develop inventive steps and improved process for greater output. At the end of the term for 2015-2017 batches around 15 students take forward the idea of applying for patent for any new inventive step created by them. The environment in Innovation Lab is a platform to hone the critical thinking skill of every student.

## **Understanding Students Learning Styles**

Understanding one's learning style is very essential to improve the overall learning process. Most of the students are not very much aware about their learning styles. Faculty engaged in imparting critical thinking skills should have an overview of each student learning methods. For instance kinesthetic learners prefer a demonstration more apt for them to grasp better. Here at RVIM students are advised to undergo an online evaluation system freely available in the web to receive the learning style results. As students are exposed to such evaluation pattern it is observed that the students start to recognize his/her strong inclination. This evaluation also helps the tutor to respond in accordance with the learning style of the individual student.

Learning style introduced in the year 2009 resulted in improved score in term end examinations also. Presently students are advised to spend few minutes in taking this online assessment provided by free websites. This method of evaluation has sustained in RVIM and is one of the best practices followed here.

Dear Chandran Sir,

This mail is to inform you that i have undertaken the Learning style evaluation test through the mail link which you have sent.

And my score is: Visual/Nonverbal 28 Visual/Verbal 28 Auditory 28 Kinesthetic 28. And also given as Balanced learning style.

Such type of self evaluation tests are helpful for us to improve our learning ability and skills. It was an interesting experience in answering such questions.

Please do send the next set of tutorial links too to my mail id as i am interested to improve my learning ability.

Thank you.

Yours Sincerely,

E mail Image-2010 Result of learning style of a student with the best performance

From

April 5, 2013

A.Chandran  
Faculty in General Management  
RVIM

To  
The Respected Director  
RVIM

Sir,

I herewith enclose relevant documents to consider this effort as one of the best practices for NAAC Accreditation .

Since 2009 I have opted around 15 minutes class interaction or e mail communication during vacation for letting the students to identify their learning styles through online assessment (free of cost). As such for the past 4 years around 400 students have benefited to adopt better learning practice .Most of e mail test are on my e-mail document for proof and verification.

Few of the sample test result and students feedback when they undergone the test are provided.

Thanking you

  
A.Chandran

  
06/04

Document Image-Learning style analysis sustains as a best practice

facilitate recall. Use highlighter pens to highlight key words and pictures on the flashcards. Limit the amount of information per card, so your mind can take a mental "picture" of the information.

Mark up the margins of your textbook with key words, symbols, and diagrams that help you remember the text. Use highlighter pens of contrasting colors to "color code" the information.

When learning mathematical or technical information, make charts to organize the information. When a mathematical problem involves a sequence of steps, draw a series of boxes, each containing the appropriate bit of information in sequence.

Use large square graph paper to assist in creating charts and diagrams that illustrate key concepts.

Use the computer to assist in organizing material that needs to be memorized. Using word processing, create tables and charts with graphics that help you to understand and retain course material. Use spreadsheet and database software to further organize material that needs to be learned.

As much as possible, translate words and ideas into symbols, pictures, and diagrams.

Your primary learning style is:

The Visual/ Verbal Learning Style

You learn best when information is presented visually and in a written language format. In a classroom setting, you benefit from instructors who use the blackboard (or overhead projector) to list the essential points of a lecture, or who provide you with an outline to follow along with during lecture. You benefit from information obtained from textbooks and class notes. You tend to like to study by yourself in a quiet room. You often see information "in your mind's eye" when you are trying to remember something. //

This analysis made me realize that I am a visual learner and I understand things better by reading, writing and observing my surroundings. My score are as follows:

- Auditory: 25%
- Visual: 45%
- Tactile: 30%

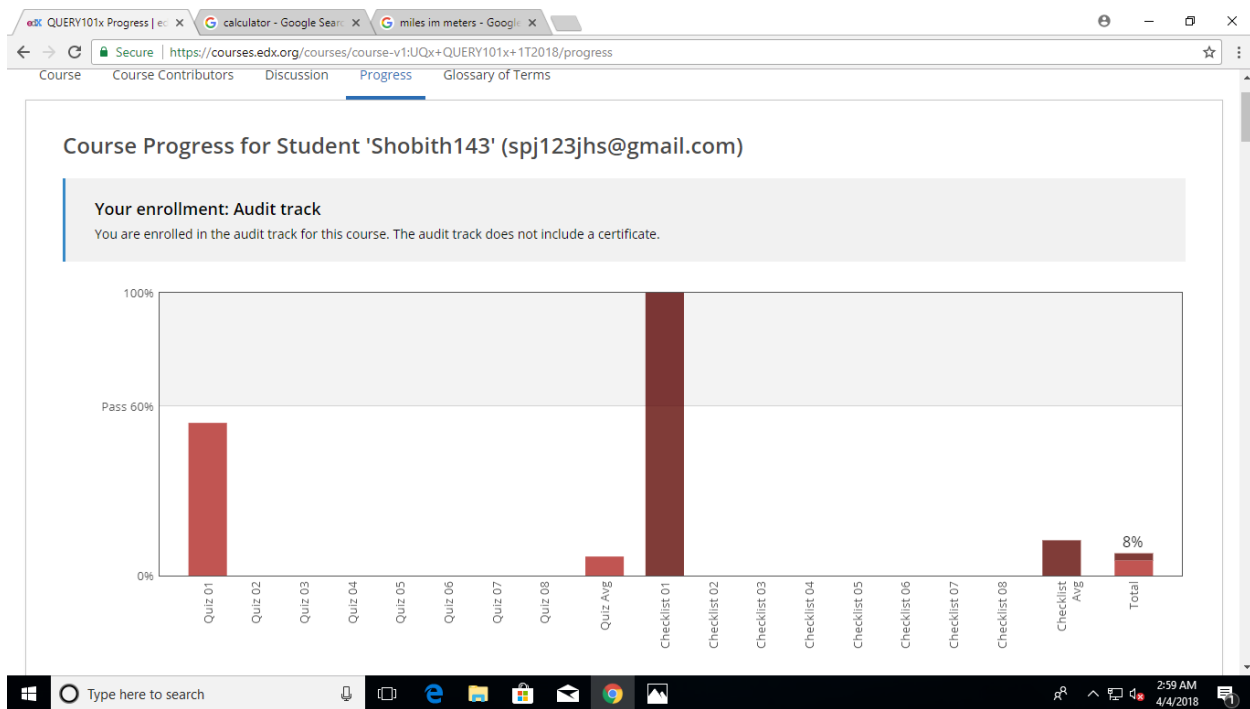

The tips given to practice or improve our learning style, believe to make me a better learner.

Thank you,  
Tejaswini B

i like to prefer more diagrammatically, or through picturisation. i prefer group studies as it involves more sharing of informations.

with the help of these feedback, plz guide me to do better..

thanking you

to me, chandran\_vissi., chandran\_vision

Dear sir/Madam :

This is very good questionnaire survey did by DVC to know about students mentality or perception towards learning.

Every students has a unique personality, one child is different from another.  
Personality, Attitude, differs a lot.

Some students are very good at Verbal learning style, some are non-verbal learning style, Auditory learning style, and Tactile learning style. If we know our style clearly It really helps fetch our ideas in different dimensions.

The questions are really confusing for every student, because he/ she never try to know about their learning style, these questions really helps to know their style.

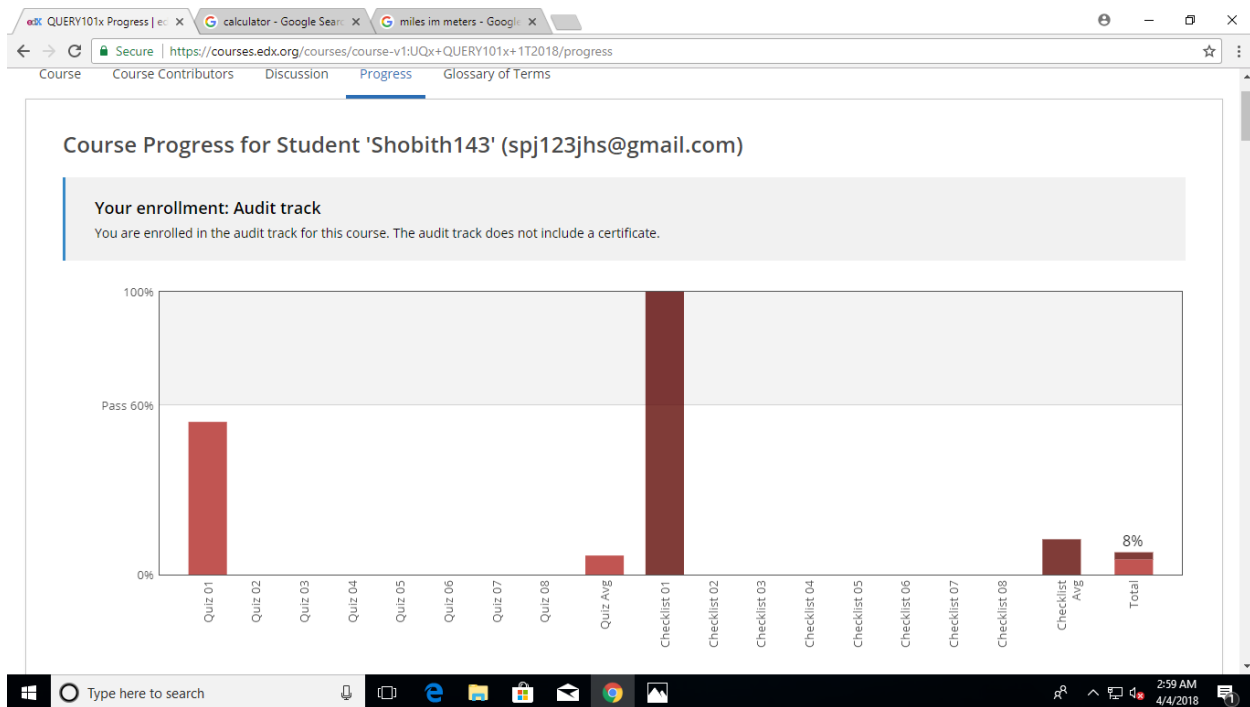

From these Questions, we really helps to know our learning ability.

Conclusion : From the marks I am good at Non verbal, verbal, and Auditory. But also I LEARNING to manage myself in Kinesthetic.

Thanking you
