

Waste Management Facilities in the Institution

The Institution adopts sustainable practices to efficiently manage various types of degradable and non-degradable waste, ensuring environmental responsibility.

Solid Waste Management:

Segregation at source is strictly followed with labelled bins for biodegradable, non-biodegradable, and recyclable waste. Organic waste is processed into compost using composting units, which is utilized in campus gardens. Non-biodegradable waste is handed over to authorized recyclers.

Liquid Waste Management:

Efficient liquid waste management includes a sewage treatment plant (STP) that processes wastewater for reuse in gardening and cleaning. Laboratory and chemical waste is treated as per environmental safety guidelines before disposal.

E-Waste Management:

E-waste is collected through dedicated bins and stored securely. Outdated electronics are responsibly disposed of or recycled by authorized e-waste management agencies. Awareness drives ensure minimal electronic waste generation.

Waste Recycling System:

Recycling initiatives include paper recycling for reuse in administrative tasks and upcycling workshops for students. Plastic waste is handed over to authorized recyclers.

Sanitary Waste Management:

Sanitary napkin disposal units and incinerators are installed in restrooms to ensure hygienic and environmentally safe disposal of sanitary waste.
