Taught basics of computer like parts of computer, input and output devices

Response by the children

The kids really got into the activity and wanted me to come over every day to spend time with them and make multiple activities, which they really enjoyed and took part in. It was great that so many students participated in the activity and displayed their talent because they were never able to do so in their academic institution.

LEARNING OUTCOMES FROM SIP

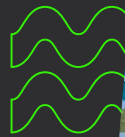

- The main thing which I have learned from this internship is to keep ourselves involved in all these kinds of social work.
- as it makes us realize how meaningful our lives becomes when we are there for others in need and it gives us a ray of hope as well as the blessed feeling which is not at all easy to get these days.
- Despite all the hurdles it truly moved us to offer back to society. My overall experience gave another angle to look and contribute towards our society.

FUTURE COURSE OF ACTION

- I can schedule frequent visits to the NGO in the future.
- I can increase awareness of the work done by the Bodhi Ally Foundation using my networking abilities.
- Because of my relationships and interactions with the NGO, I may even ask my friends and relatives for donations.
