Report Title

National Energy Conservation Day

December 14, 2021

Scheme

National Programme for LED- Based Home & Street lighting

Impact

The programme influenced all the participants to follow Switch OFF when NOT in use. The counting of energy consumption provided better understanding of energy saved by reading the electricity bill at home.

Every year on December 14, the Union Ministry of Power's Bureau of Energy Efficiency (BEE) observes National Energy Conservation Day. The BEE implemented the India Energy Conservation Act in 2001. BEE is a constitutional body that advises the government of India on energy-saving policies and strategies.

Considering the vast potential of energy savings and benefits of energy efficiency, the Government of India enacted the Energy Conservation Act, 2001 (52 of 2001). The Act provides for the legal framework, institutional arrangement and a regulatory mechanism at the Central and State level to embark upon energy efficiency drive in the country.

National Programme for LED-based Home and Street Lighting

The initiative is part of the Government's efforts to spread the message of energy efficiency in the country. LED bulbs have a very long life, almost 50 times more than ordinary bulbs, and 8-10 times that of CFLs, and therefore provide both energy and cost savings in the medium term.

This programme was aligned with the objectives of BEE towards energy conservation. The students were informed about various practices towards conservation and encouraged to use LED based lighting at all times. The programme covered around 180 students participation.

The pledge were taken to follow better methods to save energy.

The programme met the objectives of SDG 7 Affordable and Clean Energy, SDG 13 Climate Action.

Fwd: Celebrating Energy Conservation Day on the 14th December 2021, between 11A.M - 12.30 P.M through virtual mode.

Subject: Celebrating Energy Conservation Day on the 14th December 2021, between 11A.M - 12.30 P.M through virtual mode.

To: <rv@rvei.edu.in>

Dear Sir/Madam,
Greetings from AICTE..!!

As you are aware, this 14th December, we are celebrating Energy Conservation Day. IIT Bombay is organizing a number of activities including :

- (a) A Talk
- (b) Quiz Session
- (c) Q&A Session
- (d) A Pledge Session

The event is scheduled to take place on the **14th December 2021**, between **11A.M - 12.30 P.M** through **virtual mode**. **E-certificates will be provided to the participants.**

Title: Why should we conserve before we generate?

Abstract

Gandhiji's statement that "Earth has enough for everybody's need but not for anybody's greed" is as fundamental as the Sun rising from the East. However, in contradiction, the world economies are increasingly trying to produce more and consume more. This contradiction is fuelled mainly (80-85%) by fossil energy, leading to another contradiction. Manufacturing of any sort required resources, which itself leads to carbon emissions, even if it's for clean energy like solar energy. This is resulting in catastrophic climate change. Deriving from his experiences from Energy Swaraj, Prof. Solanki on this Energy Conservation Day will be addressing the audiences about the importance of conserving energy before generating it.

WHY SHOULD WE CONSERVE BEFORE WE GENERATE?

A talk by Solar Man of India - Prof. Chetan Singh Solanki, followed by a Quiz and a Q&A Session. The participants will also be encouraged to take a Pledge to conserve energy and E-Certificates will be provided after taking the pledge. The event is scheduled to take place on the 14th December 2021, between 11 A.M - 12.30 P.M through virtual mode.

Energy conservation is the decision and practice of using less energy. Turning off the light when you leave the room, unplugging appliances when they're not in use and walking instead of driving are all examples of energy conservation.

Conserving energy is an important way to reduce strain on the environment and bring down electricity and expenses.

Energy conservation supports an eco-friendly lifestyle by providing energy, which saves money.

The social media tweets and other contents in internet of Energy Swaraj Foundation was shared to the classes and in the groups for wider reach and to encourage active participation.

Class Participation-Energy Conservation Pledge

The Pledge brought in a strong commitment by the students and all the staff participants to always look for positive approach towards energy saving method
