REPORT
ON
Training on AI & Future Trends
as part of
Employability Skills course

Date: 23.08.2025	Venue: Seminar Hall Conducted By : Center For Career Development Resource Person: Mr. Sean Sarathy
Overview: As part of the employability and career readiness initiatives for MBA students (Batch 2024–26), a training session on <i>Artificial Intelligence (AI) & Future Trends</i> was conducted by Mr. Sean Shastry. The session highlighted how AI is transforming businesses across industries and prepared students to understand the future of work in the digital age. The resource person shared insights into current AI applications, emerging trends, and the skills needed to thrive in a technology-driven workplace. <u>Objectives :</u> • To provide students with an understanding of AI and its business applications. • To highlight the future impact of AI on industries, jobs, and society. • To familiarize students with emerging technological trends shaping global business. • To encourage students to develop digital literacy and adaptability. • To inspire students to align their career planning with future industry needs. <u>Agenda / Flow of the Event:</u> • Introduction to AI – Basics of Artificial Intelligence, Machine Learning, and Data Science. • AI in Business – Case studies of AI adoption in finance, healthcare, retail, and HR. • Future Trends – Robotics, automation, blockchain, and sustainable technologies. • Impact on Careers – How AI is reshaping job roles and skills in demand. • Ethics & Governance – Responsible use of AI and ethical considerations. • Interactive Session – Q&A and discussion on how students can prepare for the future workplace.	
Take away of the session : Learning Highlights: Students gained awareness of how AI is integrated into everyday business operations. • Insights into future job opportunities and skill requirements were shared. • Students understood the importance of adaptability, creativity, and lifelong learning in the AI era.	

- The session encouraged students to explore AI tools and applications relevant to their domains.

Takeaway of the Session:

The training was informative and futuristic, enabling students to connect management education with emerging technologies. The interactive discussions motivated students to think critically about their career choices in light of technological disruptions. The session is expected to broaden their perspective on employability and innovation in a rapidly evolving business landscape.

- Students gained awareness of how AI is integrated into everyday business operations.
- Insights into future job opportunities and skill requirements were shared.
- Students understood the importance of adaptability, creativity, and lifelong learning in the AI era.
- The session encouraged students to explore AI tools and applications relevant to their domains.
