RVIM Student Volunteers

Staff Participation

VIKAAS - Day Care - A day care scheme for persons with autism, cerebral palsy, mental retardation and multiple disabilities, above 10 years for enhancing interpersonal and vocational skills.

The CHILDRENS at MANONANDANA and PARENTS were grateful for the SUPPORT

Autism is a neurodevelopmental disorder characterized by impaired social interaction, verbal and non-verbal communication, and restricted and repetitive behavior. The diagnostic criteria require that symptoms become apparent before a child is three years old. Autism affects information processing in the brain.

Cerebral palsy is a group of disorders that affect movement and muscle tone or posture. It's caused by damage that occurs to the immature, developing brain, most often before birth.

ALL SUCH CHILDREN NEED SUPPORT

RVIM Student Volunteers provided the right kind of support in the Awareness Programmes and participated in the interactions with the childrens and parents

THE IMPACT

The participation on this programme provided an understanding and empathy to the student volunteers. The school children may enhance their interpersonal skills .
