

Title	
Order Management, Procurement & Inventory Management using Oracle ERP	
Date: 9th April 2025	Venue: RVIM Seminar Hall
Time: 3.30 pm—4.30 pm	Event : Order Management, Procurement & Inventory Management using Oracle ERP
No. of Participants: 45	Event Coordinators: Prof. Venkatesh C S

1. Objectives of the event:

The objective of the session was to familiarize students with the fundamentals and practical applications of Order Management, Procurement, and Inventory Management. The event aimed to help students understand end-to-end supply chain processes, industry best practices, and the role these functions play in operational efficiency and cost optimization.

2. Event Details

a) Brief description of the event

An academic and industry-oriented session was conducted covering key concepts of Order Management, Procurement, and Inventory Management. The resource person explained the complete lifecycle of an order, procurement strategies, vendor management, inventory control techniques, and the use of systems and tools in managing these functions. Real-time examples and case-based discussions were used to connect theoretical concepts with practical business scenarios

The talk was on how Order Management and Procurement functions may be implemented using an ERP system. A Case study of Ford Motor Co. was used to illustrate the functionality

b) Brief profile the resource person/s

Guest Names	Designation	Team
Ms.Yogeshwari of PwC	ERP Consultants	PwC
Rishi Sagar B.K.	ERP Consultants	PwC

Both of the speakers are RVIM alumni and working in PwC as consultants involved in ERP implementations (Oracle)

c) Outcome attained

Participants gained a clear understanding of integrated supply chain operations and the interrelationship between order processing, procurement, and inventory control. The session enhanced students' analytical and operational perspectives, improved their awareness of industry practices, and equipped them with practical insights relevant to operations, supply chain, and logistics roles
