

Seminar Organized by RVIM
on
Human Anatomy for (MBA Batch 2022-24)
By
Dr Jahan Zeb (HOD-Department of Human Anatomy)
KLE Institute of Dental Sciences, Bangalore

Date: 27 th September 2023	Venue: Seminar Hall (RV Institute of Management)
Time: 07.30 am to 09.30 am	Event : Seminar
No. of Participants: 163	Event Coordinator: Asst. Professor Ankita Shrivastava
Section: A, B and C (MBA Batch 2022-24)	

Objectives

- To impart knowledge on gross human structure.
- To brief about all the systems of human body.
- To understand various biological systems that carry out specific functions necessary for every day healthy living.

The flow of the Event

- Introduction to anatomy and identification and description of the structures of human beings.
- Different types of systems & It's importance as group of organs.

Outcome Achieved:

The resource person commenced with explanation of why it is important to be aware of various systems that results in healthy functioning of a human body.

The session was then started with musculoskeletal system includes bones, muscles, tendons, ligaments and soft tissues which work together to support your body's weight and help you move. Injuries, disease and aging can cause pain, stiffness and other problems with movement and function.

Further cardiovascular system was discussed which delivers oxygen, nutrients, hormones, and other important substances to cells and organs in the body, also as it plays an important role in helping the body meet the demands of activity, exercise, and stress. It also helps maintain body temperature, among other things.

The resource person further described about respiratory system being the network of organs and tissues that help you breathe. This system helps your body absorb oxygen from the air so your organs can work. It also cleans waste gases, such as carbon dioxide, from your blood. Common problems include allergies, diseases or infections.

Further session included nervous system which has cells called neurons to send signals, or messages, all over

your body. These electrical signals travel between your brain, skin, organs, glands and muscles.

The session further included the description on digestive system which breaks down food into nutrients such as carbohydrates, fats and proteins. They can then be absorbed into the bloodstream so the body can use them for energy, growth and repair.

The session further included discussion on urinary system, endocrine system, lymphatic system, reproductive system and integumentary system.

Feedback & Coordinator Comment:

The resource person had a rich expertise in teaching and imparting knowledge on Human Anatomy and the basic human structure required for a healthy and fulfilling life. The seminar was excellent, and the resource person was very good and well versed in their knowledge on the topic. It was a great program including demonstration of the scenarios and the resource person has delivered in a very simple manner, the participants have got a great insight on overall wellbeing.

All Students (Section A+B+C) kind attention.

A combined yoga class for all Sections has been arranged on 27.09.2023 (Wednesday) from 07:30 am to 09:30 am for this week.

As a part of Health and Wellness curriculum, a **Workshop** on "A walkthrough on Human Anatomy" with Dr. Jahan Zeb as resource person, has been organised for 2nd Semester students.

 **Date: 27.09.2023 (Wednesday)**

 **Time: 07:30 am to 09:30 am**

 **Venue: Seminar Hall, 3rd Floor RVIM**

Attendance is compulsory and a quiz will be conducted the basis of the information imparted during session.

Attendance marks and quiz marks will be included in IA marks.

All are advised to take a note of the schedule and be present in Seminar hall 3rd floor accordingly.

Thanks
Ankita Shrivastava
